Loanwords

- Xtree thesaurus management Software

What is xTree?

- A central, web-based tool to administer vocabularies (e.g. thesauri, classifications, lists, taxonomies, folksonomies)
- is semantically interoperable within ISO/DIS 25964-1 (ThesaurusConcept, ThesaurusArray, ConceptGroup), ANSI/NISO Z39.19-2005, ISO 2788 and DIN 1463-1
- is compatible with the data model of BS DD 8723-5
- **has a multi-lingual data model**
- is usable with common web-browser software (e.g. Firefox 3, Internet Explorer 8)
- is easy to handle (e.g. drag and drop)
- uses the museumvok Webservice
- **uses SKOS RDF**
- **is built for collaborative work**
- is developed with Open Source software
- XSD- and RDF-based Webservice

New flag: 'translation N/A'

Dutch AAT has a set of 'Untranslatables'
How to flag these concepts?
Checked but not translated...

'half-tester beds'

ID 300038710

ner concept

New flag: 'literal translation'

When there's no equivalent, but translator can literally translate

'guideboats' becomes 'gidsboten'

ID 300232771

Option for some 'untranslatables' (If it makes sense...)

Editorial issues

doden (nl) -- (Monday, 7 August 2017, rweda_admin)

i **Thema:**

i **Conc. label:** doden (nl)

i **Betrifft:**

i **text:** Ja, in de zin van 'er vielen verschillende doden'. omdat sterfgevallen er ook bij staan. lastig, de staat van het dood zijn moet wellicht ook in de scope? De alternate term 'deaths' maakt I (de gestorven organismen). De 'dood' als iconografisch onderwerp moet je eigenlijk in Iconclass zoeken.

i **Text language:** Dutch

i **Creator:** rweda_admin

i **Creation date:** Monday, 7 August 2017

i **Status:** Open

doden (nl) -- (Friday, 4 August 2017, kandree)

i **Thema:**

i **Conc. label:** doden (nl)

i **Betrifft:**

i **text:** Ik zie dat je ook 'doden' heb ingevoerd. Slaat dit dan op de personen? Want dit concept gaat over een 'personal life event, een actie dus? 'Dood' in de Anet betekenis gaat over het door van het bestaande concept zie ik daar bij aanleunen. Maar dode als persoon heeft toch een andere betekenis?

i **Text language:** Dutch

i **Creator:** kandree

i **Creation date:** Friday, 4 August 2017

i **Status:** Open

i **Adressat:**

i **Projekt:**

dood (nl) -- (Friday, 4 August 2017, rweda)

Concept proposals

Visual Fashion and Costume Thesaurus

Ykje Wildenborg, project coordinator, MOMU, Antwerp

IMAGINE *browsing through* WORLDWIDE FASHION HERITAGE in one SINGLE web portal ...

Ykje Wildenberg, Fashion Museum Antwerp
ykje.wildenberg@mamu.be

Is there a lovelier thought for a fashion passionate? Slight problem: most likely we will not discover all the objects we're trying to find. In order for the pieces to be found, we will need to prepare their metadata.

Riksmuseum BK 1902 BK 4

MoA Fashion Museum Antwerp T122010

Central Museum BH

<http://vocab.getty.edu/aat/300215822>

WHY CAN'T IT JUST WORK?

To make such a thing possible, the items should be described using the exact same words of a particular language, not to mention the issue of multilinguality. Recent IT developments prove promising to solve the problem. It's as simple as this: standardized codes should accompany terms in a database. After all, a banyan isn't always labeled as "Banyan", but also as "Indian gown", and across the borders as "Japansche rock" or "Japonez rok". A unique code would equalize them.

MODE D'EMPLOI

The Getty Center, Los Angeles

The ART concept "Tanyan"

Fashion specialists and collection managers will have to collaborate. To every Object Name used, a standard code should be donated. The codes actually are some sort of URI called a URI: a Uniform Resource Identifier. Ready-made vocabularies such as the Getty's Art & Architecture Thesaurus have these URI's available for free, accompanying the concepts.

To do list

- export your collection.
- "clean" it, to make sure there aren't any misspelled terms or different terms that mean the same thing (combinaison, combination). For this you can use free software called OpenRefine.
- choose a Linked Open Data vocabulary to add links to your set, again, aided by the software.
- re-integrate the cleaned data into your system.
- you're linked!

Any metadata in the Museum database are linked to a controlled vocabulary

Once these URI's are added to your database, you will have "Linked Data", and you will have updated your fashion collection to nowadays' current IT-standards. The magical result (enhanced search performance) will happen when you publish your collection online. This isn't exclusively fashion-related: Linked Data is a hot topic now being implemented by libraries, archives, museums and governments alike.

Become the proud owner of LINKED DATA

<http://viaf.org/viaf/54156365>

Christian Dior

Dior, Christian

A plurality of Christian Diors

Linked data works for other aspects as well: we all know that the late Christian Dior exists in our databases as "Dior", "Dior, Christian" or even "Christian Dior". Alike the AAT, "VIAF" is a name authority file featuring a URI for the French couturier.

How DUTCH & BELGIAN MUSEUMS are taking the FIRST STEPS

David Wing has prepared drawings to illustrate the database on the Platform portal

MoA MoA - Fashion Museum Antwerp

From the project's headquarters at Antwerp Fashion Museum a part time project worker makes sure that all of the collection managers gain the needed knowledge and that the curators decide about the right URI's for their holdings. For this reason all the terms currently used are being analyzed and compared with the AAT. For missing terms a new concept and ID will be created.

Collection list of the Platform portal

A group of key people in the field stands by, with backgrounds in user experiences, IT, collection registration and thesauri management. The Flemish Government enabled the pilot through a grant

Record Ty

 **amazones** (riding habits, sports clothing, ... Furnishings and Equipment (hierarchy name))

Note: Riding habits for women, in fashion from the early 18th century, used specifically for riding sidesaddl. Variously described as tailored masculinized ensembles that may include long skirts that cover riding pants, jackets, top hats, and gloves.

Terms:

amazones (**preferred**,C,U,English-P,D,U,PN)

amazone (C,U,English,AD,U,SN)

amazonekostuum (C,U,Dutch,AD,U,U)

amazonekostuums (C,U,Dutch-P,D,U,U)

Facet/Hierarchy Code: V.TE

Hierarchical Position:

-  Objects Facet
-  Furnishings and Equipment (hierarchy name) (G)
-  Costume (hierarchy name) (G)
-  costume (mode of fashion) (G)
-  <costume by function> (G)
-  sports clothing (G)
-  riding habits (G)
-  amazones (P,U)

Additional Notes:

Dutch Ruiterkostuum voor vrouwen, in zwang sinds de 18e eeuw, met zwart als meest voor de ha liggende kleur. Bestaande uit zware wollen rok, met inzet om de benen ook in amazonezit te bedekker meest mannelijke uitdossing in de vrouwelijke garderobe. De bovenkleding voor het bovenlijf zijn over aan formele kleding voor de man: jasje, overhemd en eventueel gilet.
