

Fundamentals of the Conservation of Photographs

SESSION: Treatments: Surface Cleaning, Adhesives Removal, Fills & In painting, Hands-on Practicum

INSTRUCTOR: Tram Vo and Janka Krizanova

SESSION OUTLINE

ABSTRACT

These sessions will review information and concerns relating to some treatments in photographic conservation (surface cleaning, adhesives removal, fills and inpainting). Please look at the schedule for Module 3 online for specific dates.

LEARNING OBJECTIVES

As a result of this session, participants will be more comfortable at identifying and understanding treatment needs for individual photographs. The conservators will be more comfortable performing these treatments and the non-conservators will be able to discuss treatment options to colleagues.
