

Fundamentals of the Conservation of Photographs

SESSION: Photo ID: Collodion (Matte and Glossy)

INSTRUCTOR: Tram Vo and Janka Krizanova

SESSION OUTLINE

ABSTRACT

The session will review fundamental information for matte and glossy collodion photographs. The materials will cover history, technique, visual identification, deterioration mechanisms, storage concerns and possible treatments.

LEARNING OBJECTIVES

As a result of this session, participants will be more comfortable at identifying collodion photographs. Have a better understanding of the history, technique and deterioration mechanisms. Know storage concerns and possible treatments.
